Top Emerging Technologies & Trends in 2020 that Tatweer planning to implement

Artificial Intelligence

AI to a great wonder has been proceeding to have its spot in the run down of top innovation patterns for very a few years and now has discovered a place in 2020 innovation forecasts also.

At Tatweer, we realized that the only acceptable way forward was to embrace the transformative power of AI and use it in building jobs of the future. Building intelligent businesses of the future require precision planning. At Tatweer, we have a dedicated team of 'Intelligence experts who can identify AI opportunities within your organization/entity – Our 'Intelligence experts understand your business objectives and then get a sense of your existing systems to build Proof of Concepts for your business. We help you move quickly and seamlessly towards the Intelligence Experience and ensure that you stay connected to a brave new reality.

5G

5g will discover its place in the market very soon, carrying with itself pros, for example, high web speed, lower inactivity, and higher limits.

As the journey to deliver the full promise of 5G, Tatweer has been supporting forward-thinking network operators and equipment vendors and embracing the technology in upcoming projects and upgrading the existing infrastructure to accommodate the 5G technology. Tatweer multiple projects already are upgraded to support 5G network once available. SMART Towers all over UAE, Intelligent Patrols and Driving Vehicles are all capable to support 5G network.

Digital Ecosystems

A digital ecosystem is the new flashy buzzword in the business sector. However, we had ecosystems since starting, but digital ecosystems are something new in the industry.

Digital ecosystems are made up of suppliers, customers, trading partners, applications, third-party data service providers and all respective technologies. Tatweer is taking this approach with its SMART City initiative and teaming with vendors and in-house different divisions to build a platform that will reshape an optimize the way SMART Cities work. The envision platform will create an ecosystem for law enforcements, vendors, citizens, service providers and applications to enable collaboration and work-flows between different entities across the entire smart city initiative.

Office Ergonomics

What is office ergonomics? It is fitting the workstation to the person rather than fitting the person to the workstation. Getting the right fit in the chair, work surface, keyboard, mouse and computer screen will reduce the risk of soft tissue injuries and discomfort.

MONITOR

Adjust distance and height: top of the monitor at eye-level and slightly tilted.

ARMS

Relax shoulders, forearms parallel to the floor. Minimal bend at the wrist.

CHAIR

Should have a backrest and armrests, adjust height.

LEGS

Thighs parallel to the floor.

FEET

Parallel to the floor, use a footrest if necessary.
