

New Awarded Projects

Abu Dhabi Municipality (ADM)

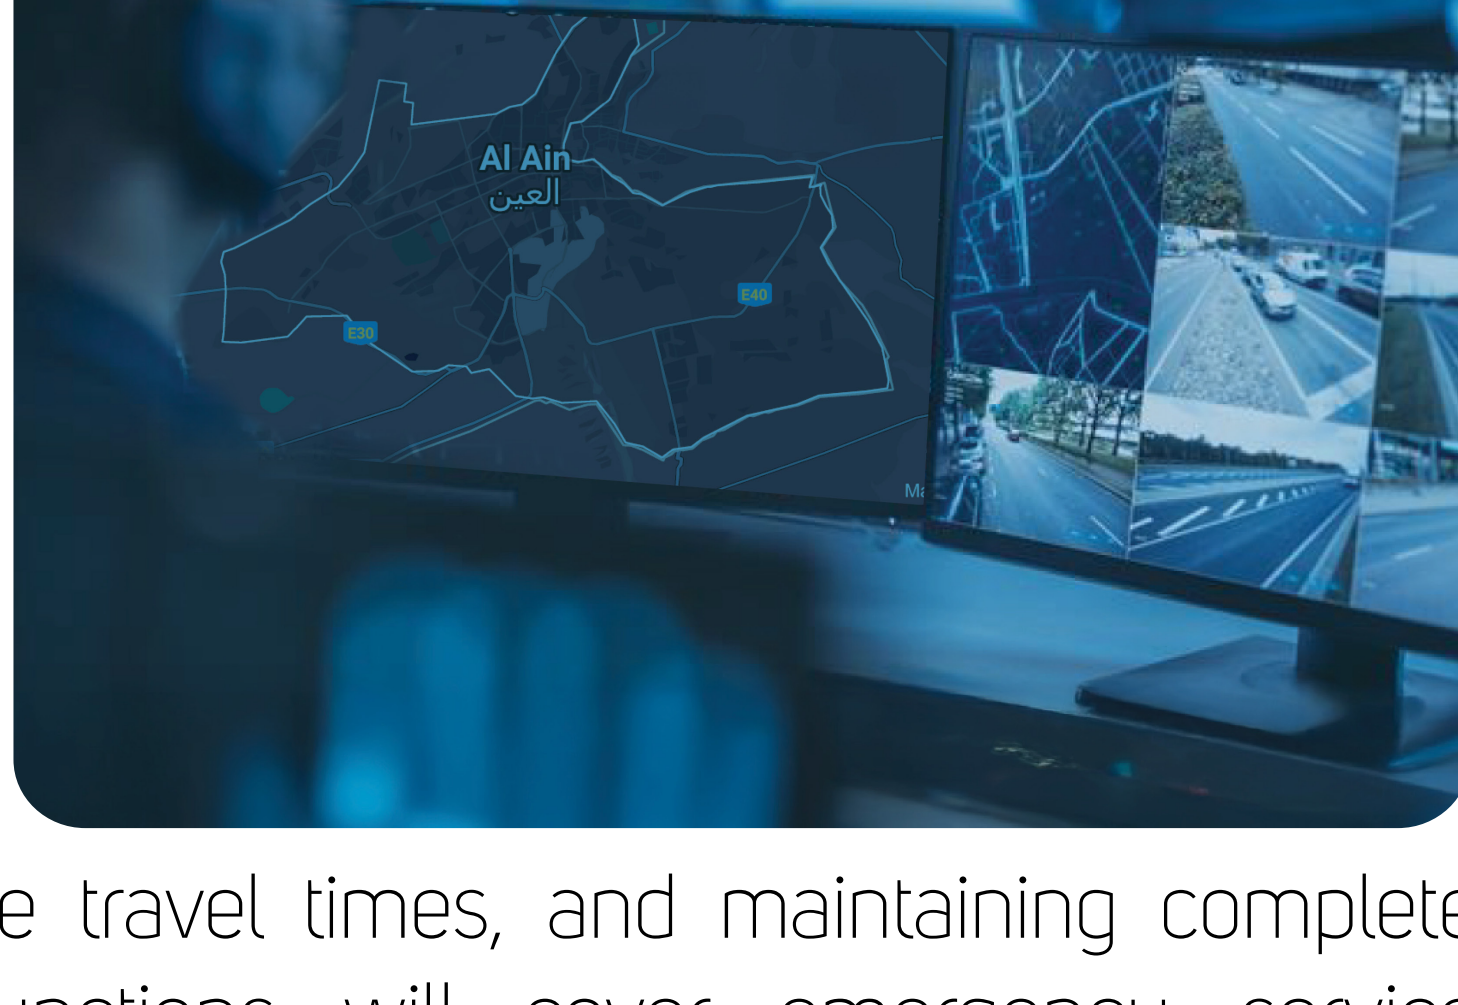

•Highway Maintenance in Abu Dhabi

To shape a more resilient and future-ready road network for Abu Dhabi, Tatweer has been entrusted by Abu Dhabi Municipality (ADM) with delivering end-to-end consultancy services for the management and supervision of highway maintenance across the Abu Dhabi Mainland. This strategic assignment covers the full spectrum - from in-depth studies and performance evaluations to hands-on supervision of maintenance activities across both the Northern and Southern sectors. Tatweer will unlock smarter, safer, and more sustainable road infrastructure through data-driven insights, engineering excellence, and proactive asset management.

Integrated Transport Centre (ITC)

•Al Ain Traffic Management and Operation Services

In collaboration with the Integrated Transport Centre (ITC), Tatweer is supporting the efforts of the management and optimization of Al Ain road network through efficient Traffic System Operations at the Al Ain Traffic Management Center. The comprehensive approach includes deploying technical and operational resources for 24/7 traffic monitoring, reducing congestion and recurring incidents through intelligent systems,

optimizing roadway efficiency to minimize travel times, and maintaining complete operational records. Key operational functions will cover emergency service prioritization, traffic control device operation, field resource tracking and dispatch, site surveys and inspections.

Abu Dhabi Police

•Emergency Broadcast & Notification System

To strengthen emergency readiness and ensure timely communication with the public, Abu Dhabi Police has assigned Tatweer to develop a state-of-the-art Emergency Alert System to broadcast a real-time emergency alerts and notifications directly to vehicles and general public. Designed for maximum reliability and speed, the system can seamlessly override live FM radio broadcasts to deliver urgent messages

without delay. This initiative reflects Abu Dhabi Police's commitment to proactive public safety and modern emergency response infrastructure.

Ethos Integrated Solutions

•Digital Eco-System Platform

Tatweer is partnering with Ethos Integrated Solutions, a leading company in corporate excellence and customer experience management. Ethos helps organizations deliver outstanding customer experiences providing tools to measure and improve performance. Together, we are creating a new Digital Eco-System Platform—a unified solution designed to streamline Ethos' core services through advanced digital integration. This transformative platform will deliver consistent, real-time experiences across all touchpoints and unlock new value for clients and partners. By transforming service delivery into an AI-driven, connected digital ecosystem, we are empowering Ethos to strengthen its leadership in the digital services landscape.

Abu Dhabi Hazardous Materials Management Centre (ADHMMC)

•Integrated Hazardous Materials Command and Control Center

As part of Abu Dhabi Hazardous Materials Management Centre's (ADHMMC) ongoing efforts to enhance the safe management and oversight of hazardous materials, Tatweer will be implementing an advanced inspection control environment. This advanced facility will enable real-time monitoring, data-driven decision-making, and effective emergency response coordination. The centralized hub will integrate critical operational systems

and offer seamless communication, data visualization, and system control through innovative AV, IT, and infrastructure technologies.

Zone Holding

•Oracle Fusion ERP Support Services

Oracle Fusion support services are being provided to Zone Holding, with a focus on both operational system support and strategic resource augmentation. The engagement covers key business functions, including Master Data Management (MDM), ensuring flexible and scalable support aligned with Zone evolving business needs.

New Strategic Partnerships

Hulool Solutions

A strategic Memorandum of Understanding was signed between Tatweer and Hulool Solutions, a Saudi-based firm specializing in software development, corporate transformation consulting, and business development. The collaboration paves the way for joint efforts in pursuing growth opportunities across the Saudi market. Both parties will work collaboratively to assess, develop, and implement projects aligned with their complementary services, driving sustainable growth in the Kingdom.

Kentico

Unlocking new digital possibilities with our partnership with Kentico, a global leader in AI-powered Digital Experience Platforms (DXP), to transform public sector digital services across the GCC. This collaboration combines Kentico's content management and digital experience solutions with Tatweer's proven expertise in government digital transformation. Together we will deliver:

- Seamless, data-driven citizen experiences
- Enhanced digital engagement platforms
- Accessible public communication via omni channels

New Events

Gulf Traffic Week 2025

In collaboration with Abu Dhabi Mobility, Tatweer proudly took part in this year's Gulf Traffic Week—an initiative led by the Ministry of Interior and the Federal Traffic Council under the theme "No Phone While Driving." As part of the initiative, Abu Dhabi Mobility hosted the "Driving Without a Phone" seminar - bringing together key stakeholders from across the transport sector to explore innovative strategies for improving road safety. Tatweer contributed by showcasing how advanced technologies can help reduce distracted driving, encourage responsible driver behavior, and pave the way toward smarter, safer, and more sustainable roads across the region. Together with our strategic partners, we remain committed to transforming mobility through intelligent solutions that put safety first.

Vision Zero Mid-Term Review (VZ-MTR)

The Integrated Transport Centre (ITC) launched the Vision Zero Mid-Term Review (VZ-MTR), an event and a workshop that brought together key government entities, ITC's Safety and Studies divisions, international experts, and strategic partners. Tatweer, as a key stakeholder and ITC Partner, marked its successful participation in the workshop, which provided a valuable platform to assess progress toward Vision Zero goals, exchange knowledge, and explore global best practices in road safety. Tatweer contributed to discussions on data-driven crash reduction strategies, enhanced performance measurements, and safety interventions guided by the Safe System Approach.

Business Cooperation

Republic of Karakalpakstan

We were privileged to host an esteemed delegation from the Republic of Karakalpakstan, led by H.E. Amanbai Orynbaev, Chairman of the Jokargy Kenes of Karakalpakstan, H.E. Abdulaziz Akkulov, Uzbekistan's Ambassador to the UAE, H.E. Vladimir Jolibekov, Minister of Investment and Foreign Trade, along with senior government officials and advisors. The visit marked an important step in fostering dialogue and identifying strategic collaboration opportunities for Tatweer in the Republic of Karakalpakstan. Our productive discussions explored opportunities in Smart Road Safety Solutions, Digital Transformation of Highway Infrastructure operations, and Intelligent transportation systems.
